

H2020-EU.2.1.5.1.  
Technologies for  
Factories of the Future

# Manipulation Enhancement through Robotic Guidance and Intelligent Novel Grippers

## Deformable object handling controller

## Workcell digital representation

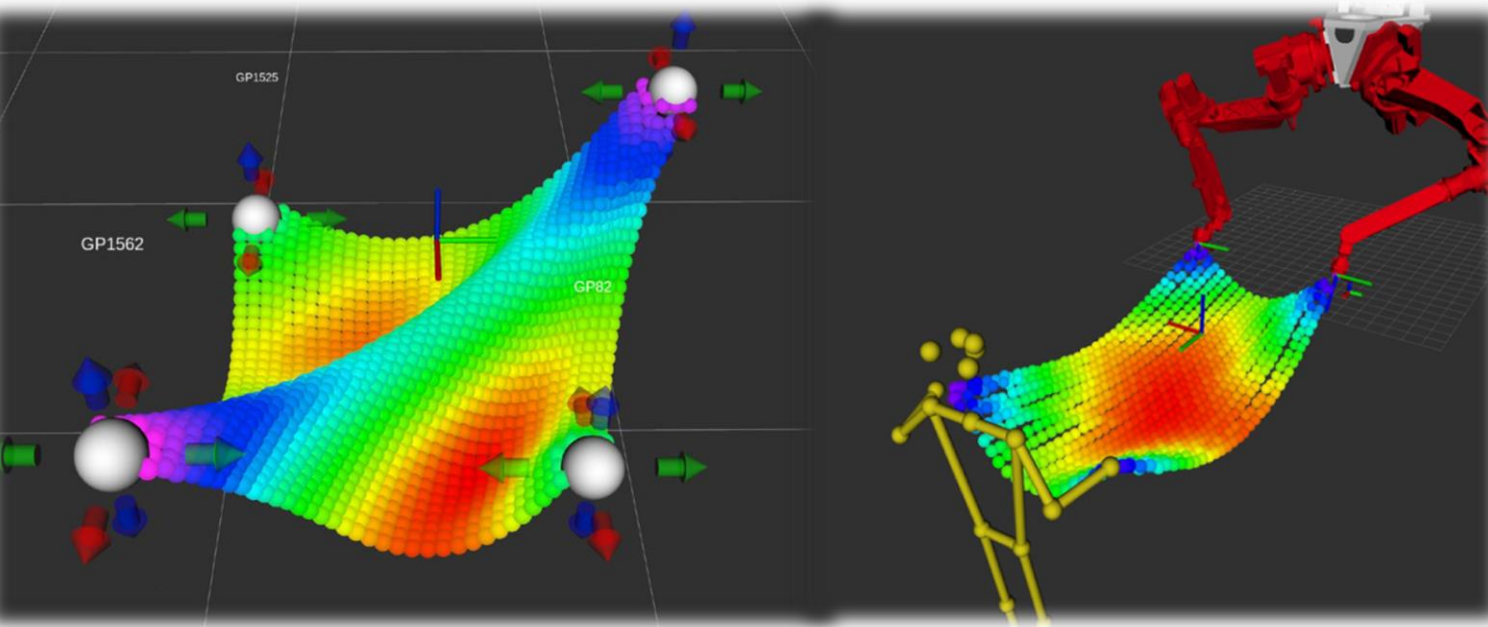

## EA enhanced dexterous & versatile gripping

## Robot perception and deformable object detection

## Flexible material modelling and simulation

## Robot easy programming, adaptive and collaborative control

## Textile and garment industry

## Food packaging industry

## Composites for automotive industry

Coordinated by

**LMS**  
Laboratory for  
Manufacturing Systems  
& Automation
